MAY is National Aboriginal Hepatitis C Awareness Month

JOIN PAUKTUUTIT AND OTHERS IN RAISING AWARENESS OF HEPATITIS C BY HOLDING AN EVENT IN YOUR COMMUNITY.

Hepatitis C is a chronic liver disease caused by the hepatitis C virus (HCV). For many, hepatitis C can show no symptoms for years but can cause serious health problems.

Hepatitis C is diagnosed with a simple blood test. If you are infected, there is treatment.

Know your risks • Protect yourself • Get tested

Visit www.pauktuutit.ca/hepatitisawareness for more information and for activity ideas.
